What are cookies?

To ensure the best user experience, we collect cookies that contain information about how our pages and apps are used. A cookie is a small file that is sent to your web browser and allows your computer, for example, to remember whether you are logged in to a website or whether there are products in your shopping cart. Some cookies are necessary to ensure the availability of our website. In this section, you can learn more about what cookies we use, what information they collect, and how you can change the cookie settings in your web browser.

In order to make purchases on our site, you must allow the use of cookies.

Cookies used in our online store

When you visit our website, cookies collect the following information about your visit: the geographical location of your device, the web browser, the language of the web browser, the date and time of the visit, and elements clicked on pages such as links.

The collected data determines whether you are logged in to your personal account and whether there are purchases in your cart from previous visits. The information is also used to analyze and improve site navigation. Collecting this data also helps us make your content more personalized.

We also use other services to automate online advertising. These services use cookies to store information about which products you were more interested in, so that we can show them to you first and not waste your time searching again.

When using our online store, we use cookies to collect information about the following actions: time and place of login, device location, language settings, searches performed, network behavior (such as what features are used and how much), device status, device model, information about hardware and operating system, and how the app works. The collected data is used in the development of e-Commerce. In this way, we guarantee the fastest possible operation of the site and can better identify and fix problems with usability and stability.

Managing cookies

In the settings of your web browser, you can see which cookies are stored on it, delete cookies that have already been saved, prohibit the use of cookies, and configure your browser so that you are asked about the use of cookies every time you visit the website.

If you delete cookies or block the use of certain cookies, some elements of the website may not work correctly. For example, cookies are required for online payment services so that you can make purchases on our site.

You can manage cookies in your browser settings:

Chrome - <https://support.google.com/chrome/answer/95647?co=GENIE.Platform%3DDesktop&hl=en-GB>

Safari - <https://support.apple.com/guide/safari/manage-cookies-and-website-data-sfri11471/mac>

Firefox - <https://support.mozilla.org/en-US/kb/clear-cookies-and-site-data-firefox>
